

SHARK

Safety Knife

INSTRUCTION GUIDELINES

- Moulded heavy duty version of the fish design
- Patented opposed exits from mouth blade for more effective cutting
- Fast easy blade change
- Ergonomic design
- Spring loaded hook blade can be positioned for automatic or manual retraction

To expose the hook blade, place your thumb on the lever at the top of the knife

Push the lever until it clicks into position and the hook blade is exposed

Puncture into the material with the hook blade

After use the hook blade will automatically retract back into the knife. If you have the knife set to manual retraction, manually retract the hook blade by flicking the bottom of the lever

Strapping / Banding

Bubble Wrap

Tape / Card

Rope / String

Stretch / Shrink Wrap

1 Turn the locking screw anti-clockwise one full turn, the screw does not need to be removed from the knife

2 Slide the top half of the knife body back

3 Reverse or replace blades

ALSO AVAILABLE WITHOUT HOOK (SHARK-H)
